OpenAIREplus

OPENAIRE IMPLEMENTOU O PROJETO PILOTO OPEN ACCESS NOS ESTADOS MEMBRO DA UE

ERC Scientific Council Guidelines for Open Access
17 December 2007

1. Scientific research is generating vast, ever increasing quantities of primary data, data structured and integrated into scientific publications. In the age of the Internet, free access to information, including scientific publications and original data, is essential for sustained progress.
2. Peer-review is of fundamental importance in ensuring the certification and dissemination of high-quality scientific research. Policies towards access to peer-reviewed scientific publications must guarantee the ability of the system to continue to deliver high-quality certification services based on scientific excellence.
3. Access to unprocessed data is needed not only for independent verification of results but, more importantly, for secure preservation and fresh utilisation of the data.
4. A number of freely accessible repositories and curated databases and data already exist serving researchers in the EU. Over time, more repositories are run by European research institutions and some scientific research have their own international discipline-specific repositories. These include for example PubMed Central for peer-reviewed publications in life sciences and medicine, the arXiv Internet preprint archive in physics, mathematics, the DDBJ/EMBL/GenBank nucleotide sequence database, the RSCB-PDB/MSD-EBI/PDBj protein structure database.
5. With few exceptions, the social sciences & humanities (SSH) do not benefit of public central repositories for their recent journal publications. The importance of open access to primary data, old manuscripts, archives is even more acute for SSH. In the social sciences and humanities, secondary data, such as social survey data and statistical data, are often available in the public domain, but usually at national level. In the case of the humanities, access to primary sources (such as archives, manuscripts and collections) is often hindered by private (or even public or nation-state) ownership and access either on a highly selective basis or not at all.

Based on these considerations, and following up on its earlier recommendations on Open Access (Appendix 1) the ERC Scientific Council has adopted the following interim position on open access:

1. The ERC requires that all peer-reviewed publications from research projects be deposited on publication into an appropriate repository where available, such as PubMed Central, ArXiv or similar, and subsequently made Open Access within 6 months of publication.
2. The ERC considers essential that primary data - which in the example could comprise data such as nucleotide/protein coordinates and anonymized epigenetic data - are deposited to the relevant databases as soon as possible immediately after publication and in any case not later than 6 months after the date of publication.

The ERC is keenly aware of the desirability to shorten the period between publication and open access beyond the currently accepted standard of 6 months.

OpenAIRE

Open Access Infrastructure for Research in Europe

Open Access Pilot in FP7

"If I have seen further it is by standing on the shoulders of giants." Isaac Newton, 1676

OBJETIVOS DO PROJETO

- Apoiar os investigadores no cumprimento das condições do Projecto-piloto Open Access do 7ºPQ através de um sistema europeu de helpdesk;
- Apoiar os investigadores no processo de depósito das publicações em repositórios institucionais ou disciplinares;
- Construir o portal OpenAIRE e a infra-estrutura electrónica para a rede de repositórios;
- Explorar serviços de gestão de dados científicos em conjunto com cinco comunidades disciplinares.

OPENAIREPLUS

CONCRETIZAÇÃO DO OPENAIRE

- **Infraestrutura aberta e participativa**
 - Rede de repositórios institucionais e disciplinares
 - Revistas Open Access
 - Secretariados Nacionais de Open Access (envolvendo outros parceiros)
- **Abordagem técnica**
 - Interoperabilidade com repositórios
 - Interoperabilidade com infraestruturas de informação da CE
 - Interoperabilidade com outras fontes de dados (OpenDOAR, DOAJ, Plos...)
 - Serviços para diferentes parceiros
 - Acesso à informação e estatísticas, Depósito, Interligar publicações aos projetos, Interligar publicações a dados, Impacto do financiamento de projetos

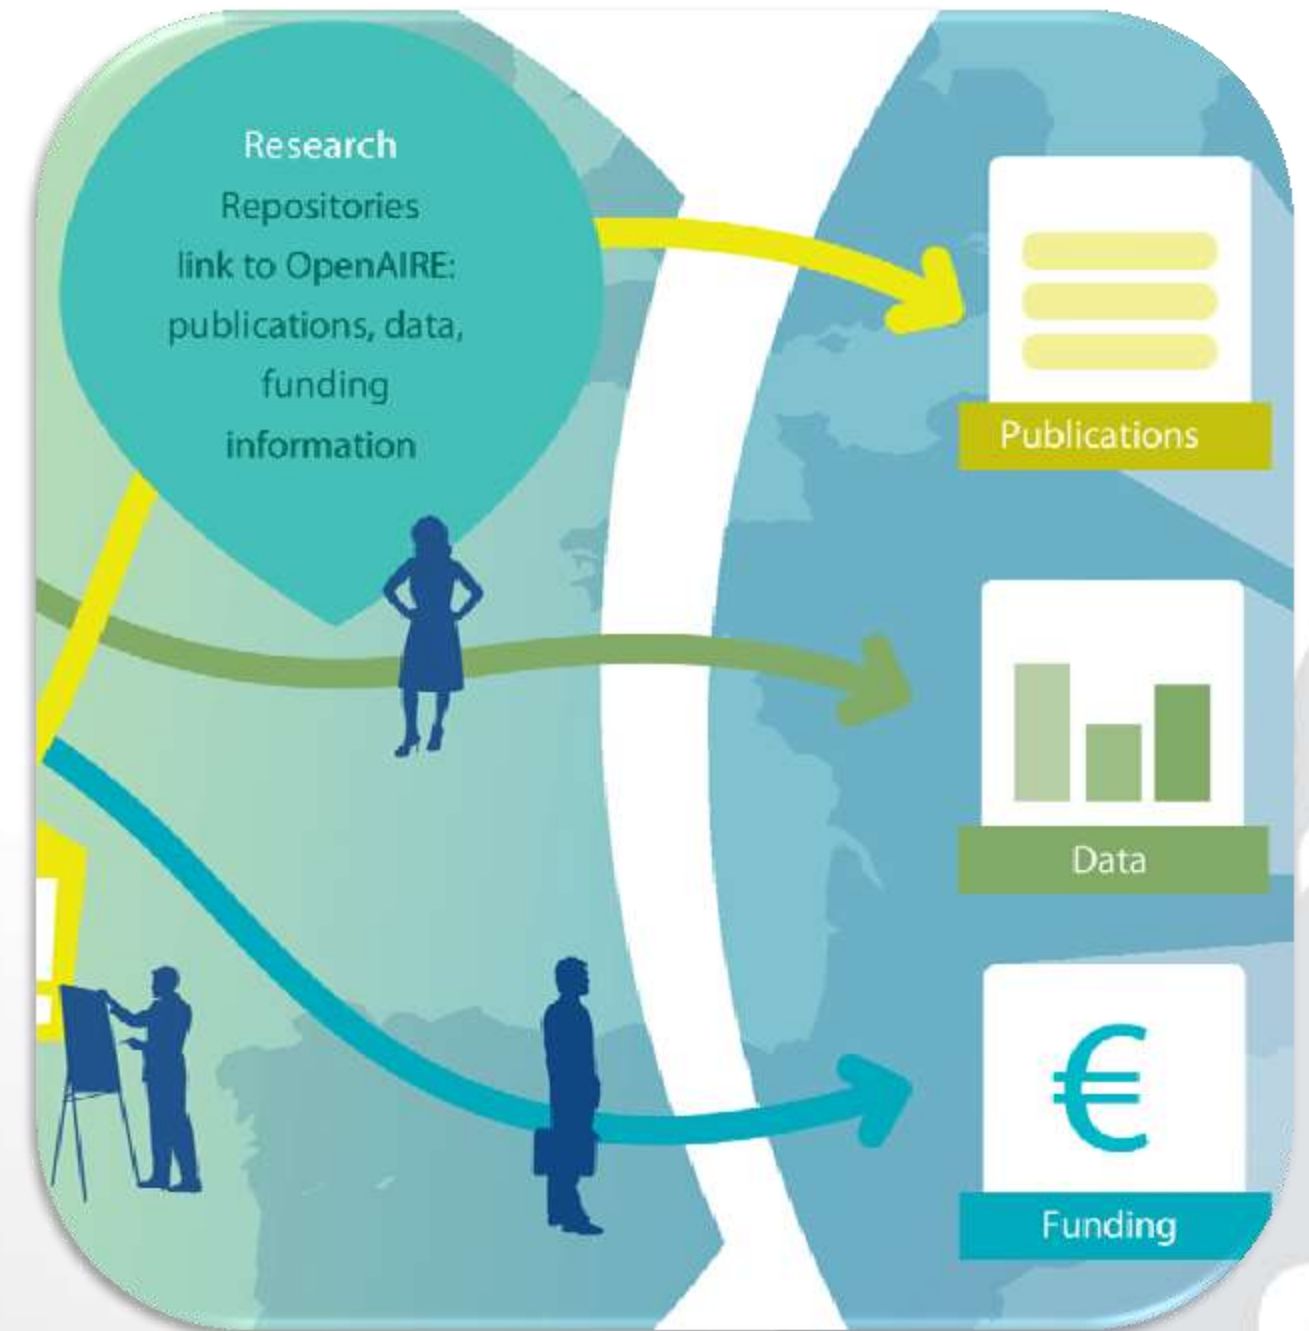

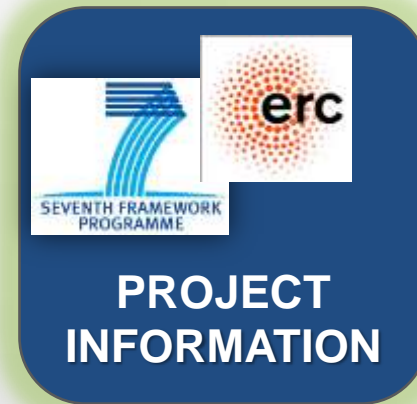

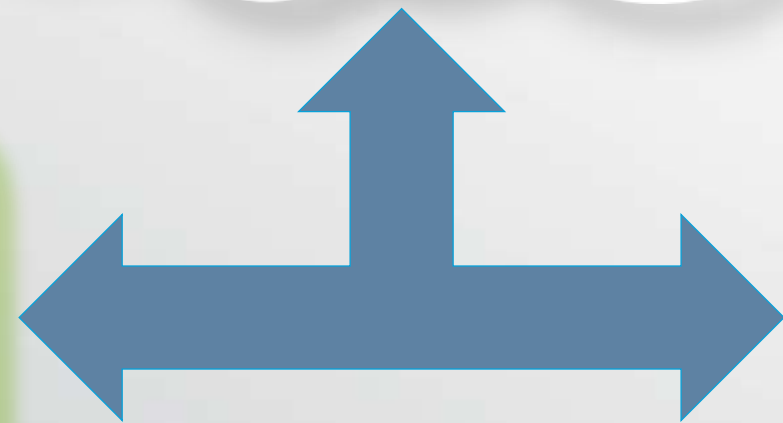

OpenAIRE »» OpenAIREplus

RESEARCHERS

FUNDERS

OpenAIREplus

- Projeto de 30 meses, iniciado em Dez. 2011
- Funcionará em conjunto com o projeto OpenAIRE
 - **estendendo** ainda mais a sua missão para facilitar o acesso a toda a produção científica do Espaço Europeu de Investigação em acesso aberto,
 - **interligando publicações com os dados científicos** associados e com os respetivos programas de financiamento.
- Reúne 41 parceiros europeus, onde estão incluídas três comunidades interdisciplinares de investigação.

Objetivos OpenAIREplus

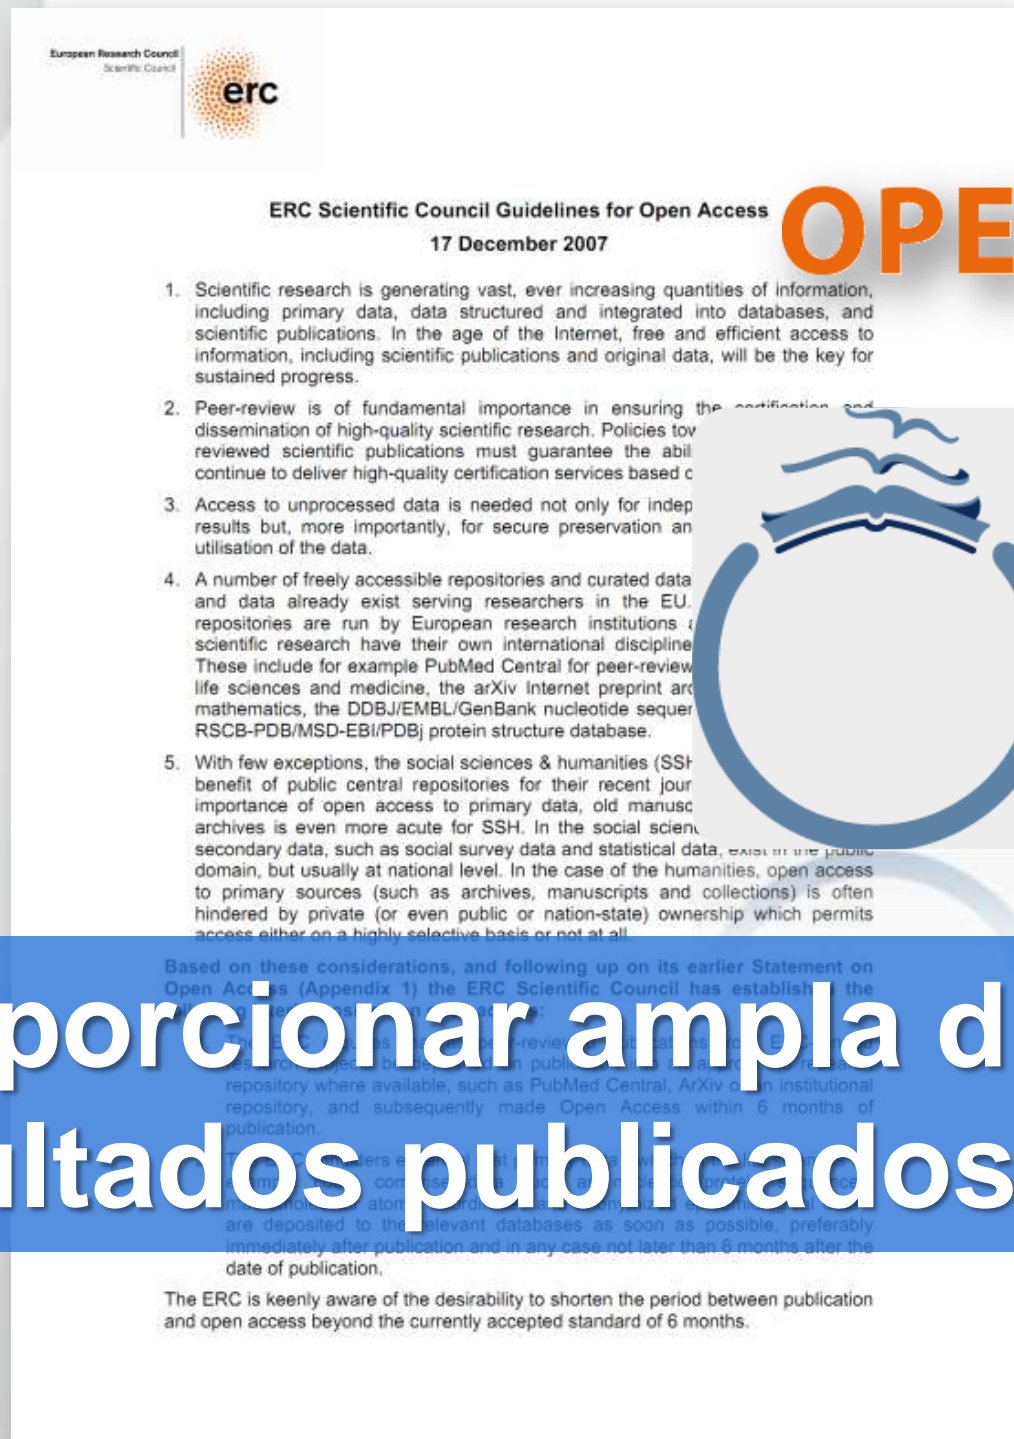

- **Ligação entre as publicações, os dados científicos e a informação dos financiadores.**
 - Consolidar a rede de repositórios institucionais.
 - Integrar os repositórios de dados.
 - Importar programas de financiamento de diferentes fontes.
- **Apoiar o acesso aberto no espaço europeu de investigação**
 - Propagar as políticas, o estudo de dados e de problemas de direitos de propriedade intelectual,
 - Abranger toda a Europa,
 - Os investigadores, gestores de investigação, responsáveis institucionais e políticos.

24x7 serviços sustentáveis a longo prazo

ERC Scientific Council Guidelines for Open Access
17 December 2007

1. Scientific research is generating vast, ever increasing quantities of information, including primary data, data structured and integrated into databases, and scientific publications. In the age of the Internet, free and efficient access to information, including scientific publications and original data, will be the key for sustained progress.
2. Peer-review is of fundamental importance in ensuring the certification and dissemination of high-quality scientific research. Policies to review scientific publications must guarantee the ability to continue to deliver high-quality certification services based on peer review.
3. Access to unprocessed data is needed not only for independent results but, more importantly, for secure preservation and utilisation of the data.
4. A number of freely accessible repositories and curated data and data already exist serving researchers in the EU. These include for example PubMed Central for peer-reviewed life sciences and medicine, the arXiv Internet preprint archive for mathematics, the DDBJ/EMBL/GenBank nucleotide sequence database, the RSCB-PDB/MSD-EBI/PDBj protein structure database.
5. With few exceptions, the social sciences & humanities (SSH) benefit of public central repositories for their recent journal articles. The importance of open access to primary data, old manuscript archives is even more acute for SSH. In the social sciences, secondary data, such as social survey data and statistical data, exist in the public domain, but usually at national level. In the case of the humanities, open access to primary sources (such as archives, manuscripts and collections) is often hindered by private (or even public or nation-state) ownership which permits access either on a highly selective basis or not at all.

Based on these considerations, and following up on its earlier Statement on Open Access (Appendix 1) the ERC Scientific Council has established the following guidelines:

The ERC is keenly aware of the desirability to shorten the period between publication and open access beyond the currently accepted standard of 6 months.

SEVENTH FRAMEWORK PROGRAMME

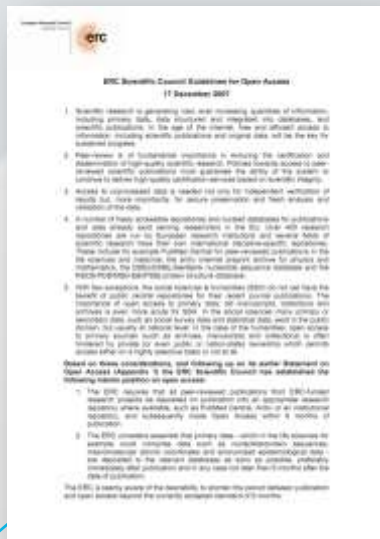

Proporcionar ampla difusão e acessibilidade aos resultados publicados da investigação financiada

Projecto-piloto Open Access do 7º PQ Conselho Europeu de Investigação

[*ERC em dezembro de 2007 e 7ºPQ em agosto 2008*]

EXIGE AOS INVESTIGADORES O **DEPÓSITO** DAS PUBLICAÇÕES
NUM **REPOSITÓRIO** INSTITUCIONAL OU DISCIPLINAR.

Aplica-se a artigos que:

- possam **revisão por pares**;
- resultem de investigação financiada pelo ERC ou numa de 7 áreas temáticas do 7ºPQ (energia, ambiente, saúde, tic, infra-estruturas de investigação, ciências na sociedade, ciências socioeconómicas e humanidades);
- tenham um acordo assinado depois de Agosto de 2008 (cláusula especial 39).

Últimos desenvolvimentos da política Open Access da CE

Desde o arranque do projeto OpenAIRE em Dezembro de 2009

- Maio 2010: Europe 2020 Flagship Initiative - Communication A Digital Agenda for Europe
- Outubro 2010: Europe 2020 Flagship Initiative - Communication Innovation Union
- **Dezembro 2010: Official launch of FP7 project OpenAIRE**
- Fevereiro 2011: EC and FP7 Project Partners 'Open Access and preservation in the European Research Area' report
- Maio 2011: Commission Communication on a Single Market for Intellectual Property Rights Boosting creativity and innovation to provide economic growth, high quality jobs and first class products and services in Europe COM(2011)
- Julho 2011: Launch of EC public consultation on scientific information (closes on 9 September 2011)

Digital Agenda

PRIME-XS

Proteomics Research Infrastructure Maximising knowledge EXchange and access (XS)

From 2011-02-01 to 2013-01-31 | PRIME-XS website

Genome sequencing initiated a new age in biology. Now, the emphasis is on the biological interpretation of the genome: zooming on the biological functioning of the gene-products, i.e. the proteins, emerging into a field termed proteomics. Protein levels depend not only on mRNA levels, but also on translational controls & regulated degradation, making the measurement of expression at the protein level...

Project details

Project reference: 262057
Status: Execution

Total cost: EUR 9 898 449
EU contribution: EUR 7 797 040

Programme acronym: FP7-INFRASTRUCTURES
Subprogramme area: INFRA-2010-1.1.14 High throughput facilities for proteome analysis
Contract type: Integrating activities / e-infrastructure / preparatory phase
